

**NOTICE OF AVAILABILITY
ENGINEERING EVALUATION/COST
ANALYSIS (EE/CA) (DRAFT) FOR
REMOVAL ACTION AT OSCAR-2 PIER
SHORELINE, U.S. NAVAL SHIPYARD,
PEARL HARBOR, HAWAII**

The Navy has initiated a removal action in accordance with 40 CFR 300, the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), to recover subsurface fuel oil in the vicinity of the Oscar-2 Pier Shoreline at Pearl Harbor Naval Shipyard. An analysis of several removal alternatives was conducted as part of an Engineering Evaluation/Cost Analysis (EE/CA). The EE/CA evaluates such factors as the cost, effectiveness, and implementability of each alternative. The proposed alternative will install a Shoreline Interceptor/Collection Trench with Passive Fuel-oil Recovery System to remove subsurface fuel oil and minimize migration of fuel oil into Pearl Harbor.

The EE/CA is currently available for review and comment by any interested agencies, individuals, and groups at the Aiea Public Library, 99-143 Moanalua Road, Aiea, Hawaii; Phone 483-7333. Written comments are encouraged and should be mailed to the address below no later than 15 April 1996.

Contact: Facilities and Environment Office
Naval Base, Pearl Harbor
Attn: Code N40
Box 110
Pearl Harbor, HI 96860-5020
Telephone: (808) 471-3324

In addition, the project administrative record file is available for public review. The administrative record file includes documents such as past studies and reports which form the basis for the selection of response actions at the site. Please contact the Facilities and Environment Office, Naval Base, Pearl Harbor, at the aforementioned address and telephone number.
